FLASH GLUCOSE MONITORING SYSTEM

 **Abbott**

Simulated data for illustrative purposes only; not real patient or data.

\* Scanning the sensor to obtain glucose values does not require lancets.

† A finger prick test using a blood glucose meter is required during times of rapidly changing glucose levels when interstitial fluid glucose levels may not accurately reflect blood glucose levels or if hypoglycaemia or impending hypoglycaemia is reported by the System or when symptoms do not match the System readings.
