

The Royal Free Hospital Asthma and Wheezing Awareness Day

We are pleased to invite you to The Royal Free Hospital Asthma and Wheezing Awareness Day. The day is free to attend and aimed at children, families and allied professionals including teachers, nurses and doctors who wish to extend their knowledge, understanding and confidence in the treatment and prevention of complications surrounding asthma and wheezing. Key to improving our service, and in order to improve overall patient care, there will also be an opportunity for you to provide feedback of your experiences whilst visiting your hospital or General Practitioner. If you are planning to attend, please reply to the email below. There will also be an opportunity to put questions before an expert panel, so this email address can also be used to send any questions you may have in advance or further information about the day.
